Business White paper  
Learn, Share, Trade & Grow  
with  
Dank Signals Club

# Abstract

The Dank Signals ecosystem is tasked with solving the problem of user interaction with cryptocurrency exchanging, continuously monitoring markets, while ensuring every member is learning and growing at their own pace as the community grows. The platform is designed to lower the threshold of entry and knowledge into the exchange trade of cryptocurrencies. Investing guidance that do not require trading knowledge, with an intuitive interface and utilizing expert traders working 24/7 will provide protection, eliminate in-experienced human error and take advantage of the volatility of the cryptocurrency for profit for these participants at their own risk..

Unlike other existing platforms, we have accumulated a maximum set of tools and services, using decades of experience and intuitive learning to input collective analysis obtained from expert traders verified by the system, while explaining and teaching these methods to newcomer traders utilizing the token throughout the platform. The platform allows you to start using after a few simple steps to fund your account, regardless of the availability or understanding of crypto-trading, since it is available from anywhere in the world - even on a mobile device with a Wi-Fi connection, with predefined settings and tools for successfully solving the main tasks of wealth accumulation and knowledge expansion.

This paper discusses the current status and future plans of the Dank Signals ecosystem. It aims to demonstrate how we are using our teams' expertise to make cryptocurrency trading & investing easy and accessible for everyone.

## Legal

- The Dank Signals team is aware of possible risks associated with a decentralized crypto-trading platform and the corresponding cryptocurrency.
- Dank Signals Tokens are not being structured or sold as securities. DANK tokens are utilized for participation in Dank Signals and DANK Tokens hold no rights or ownership of Dank Signals. DANK Tokens are sold as a functional utility and all proceeds received by Dank Signals may be spent freely by Dank Signals for trades & developments, absent of any conditions.
- Dank Signals is cautious of the potential regulatory consequences and appropriate measures have been taken to minimize risk in a commercially sensible manner.
- No promises of future performance or value are or will be made with respect to DANK tokens, including no guarantee of inherent value, and no guarantee that DANK tokens will hold any particular value or trade on a public exchange. Only once prospective participants fully understand and accept the nature of Dank Signals and the possible risks associated with investing in any cryptocurrency, should they participate in this DANK token sale.
- Dank Signals is responsive and will work with regulators as required, moving forward. As of the white paper publication date, DANK tokens have no known potential uses outside of the Dank Signals Eco-system and may or may not become a tradeable asset on public exchanges.
- Participation in the DANK token sale carries considerable risk and may involve special risks that could lead to a loss of all or a substantial portion of such an investment. Do not participate in the DANK Token Sale unless you are prepared to lose the entire amount allocated to purchasing DANK Tokens.

This whitepaper is an explanation document and is not an offer to sell, nor solicitation of any offer to buy any investment or financial instrument in any jurisdiction and should not be treated or relied upon as one.

This whitepaper is for information only. Written authorization is required for distribution of any or all parts contained herein.

- DANK tokenholder's assume risk when participating in trading activities and such activities have inherent risks. Unforeseen problems could result in the complete loss of a DANK token holder's funds or DANK token value on a P2P exchange, should be listed in the future.

All information here that is forward-looking is speculative in nature and may change in response to various uncontrollable factors, including but not limited to ; technological innovations, regulatory factors, and/or currency fluctuations and the market value of cryptocurrencies.

# Legal and Regulatory

This whitepaper is for information purposes only and is subject to change.

- Dank Signals shall have no liability for damages of any kind arising from the use, reference to or reliance on the contents of this whitepaper, even if advised of the possibility of such damages. This whitepaper includes references to third party data and industry publications. Dank Signals believes that this industry data is detailed and that its estimates and assumptions are reasonable and factual. Third party sources generally state the information contained therein has been obtained from sources believed to be reliable.

Nevertheless, the Dank Signals team is confident in their belief that they have taken all commercially reasonable steps to ensure that logistics are properly in compliance with current regulations. Dank Signals intends to invest the Dank Token contributions to fund trade opportunities, increase platform functionality, expand marketing and future ecosystem growth. Dank Signals makes no representations or warranties as to the timing of the delivery of a publicly accessible automated crypto-trading platform. All executions within are performed solely by Dank Signals

## Caution Regarding Forward Looking Statements

This whitepaper contains forward-looking statements and information that relate to Dank Signals current expectations and views of future events. Dank Signals has based these forward-looking statements on its current expectations and projections, about future events and financial trends that may affect its financial condition, results of operations, business strategy, financial needs, or the results of a token event or the value or price stability of DANK Tokens. In addition to statements relating to the matters set out here, this whitepaper contains forward-looking statements related to Dank Signals proposed operating model.

The model speaks to its objectives only, and is not a forecast, projection or prediction of future results of operations. Forward-looking statements are based on certain assumptions and analysis made by Dank Signals in light of its experience and perception of historical trends, current conditions and expected future developments and other factors it believes are appropriate, and are subject to risks and uncertainties.

Although the forward-looking statements contained in this white paper are based upon what Dank Signals believes are reasonable assumptions. Given such risks, prospective participants in this token event should not place undue reliance on these forward-looking statements.

# Summary

-  
*Dank Signals is the result of having frustration with traditional trade analyst learning methods, the difficulty of modern investment platforms, while holding a desire to contribute to the overall growth of humanity in the form of a wealth production system that anyone can participate in and benefit from individually.*  
-

It started when two friends – both blockchain enthusiasts – decided to start investing into cryptocurrencies. However, the further they immersed themselves in the blockchain technology, the more lost they initially became due to lack of information, mentors and avenues to learn. The barriers for entry were huge and the odds were stacked in the oppositions favor. After years of market research, trend analyzation and global networking, they gained unparalleled experience/expertise and came to the realisation of the potential for a platform such as Dank Signals. With backgrounds in Market Trends , User Demands, & Design/Growth Development, they had the vision to develop an automated cryptocurrency trading & information hub, like no other, This platform would operate so that it would be available to anyone at anytime. The platform would included everything from automated trading, ability to share and learn from common trade strategies, live chat assistance and detailed explanation of any executions completed which can be tailored individually to the users requests, adding additional investing options and tokenized to a blockchain for full transparency and decentralization of the service.

To date - Dank Signals is already currently a thriving community, boosted with over 500 expert crypto-trade analysts consistently scouring the markets, discovering trends and sharing knowledge. We have been in operation for over 2 months facilitating assistance to new traders, while sharing our analysts with the community for weekly trade ROI. In our exclusive members club, we successfully maintain an accumulated average weekly return on investments ranging from 20-350% for our direct investors.

As individuals, we are passionate and excited – not only about making Dank Signals a success – but also achieving success in the world of cryptography & blockchain technologies, information sharing and how the world is rapidly learning with regards to digital currencies. With the funds raised from the Dank Signals token sale, we will have the ability to expedite our eco system development and launch of Dank Signals 2.0 in 2018. We will also have the ability to fund and grow our global team of experts so that they can focus purely on Dank Signals and its' overall growth & expansion. Our group of experts are dedicated to working collectively 24/7 to deliver the list of great features, enhancements and functionalities outlined in our road map. Dank Signals has a rapidly growing network of collaborators who are eager to contribute and be part of the chain. Every investor of the DANK token sale that meets the minimum purchase requirements will instantly begin earning weekly ROI in the form of DANK tokens - which can later be exchanges through the platform back to BTC for withdrawal.

Getting this far has been an amazing journey and reaching the token sale is a big milestone for us. We would like to take this opportunity to thank all of our passionate and devoted community, and our advisors for their help and guidance along the way.

Together, we're going to change the world of wealth production

# Problem

In 2017, a sharp surge of new crypto traders are boosting trading volumes and rates of almost every alternative cryptocurrency (altcoins) and Bitcoin itself. That also makes prices of some altcoins more volatile than before, while constantly growing Bitcoin rate keeps increasing traders' stress levels. Bitcoin is losing its share in total crypto market capitalisation despite of its increasing value.

Market capitalizations of some altcoins has already exceeded hundreds of millions of dollars, and that's only the beginning. It's impossible to factor in all the trends, events and sub-reddits that shape the markets. Making a good trade can be difficult even for experienced traders, let alone newcomers. New traders don't recognise market trends and can't make good trading decisions based on experience they haven't obtained. For people who just have started to trade cryptocurrencies, the "what to buy", "where to go" and "who to trust" problem is now more important more than ever.

## The Solution

Our goal is to provide the best cryptocurrency trading/information platform that blockchain have ever seen. One that is automatic, intelligent, quick and easy to use while remaining accessible to all customers, no matter their background, trading experience or knowledge. With Dank Signals, users do not need to be an expert trader or know any analysis methods or procedures. Users can learn to trade while the system executes transactions for them, learn to understanding the market and grow their market analyst expertise.

Dank signals connects inexperienced traders to the information they need to advance. Once membership is purchased, clients gain access to a wide range of opportunity - whether through direct consulting access, investment options or smart-trading on their account. Smart- trading uses advanced algorithmic artificial intelligence trading bots to make the trades on behalf of the customer – at parameters that the customer has set or teaching lessons that they lease.

These options require no analyst skills, no previous trading experience and no in-depth knowledge of cryptocurrencies. Dank Signals is suitable for anyone who wants to trade and invest in the cryptocurrency market but does not have the relevant skills or the time to watch the markets all day long. Just fund your account with cryptocurrency, convert it to Dank Tokens and our automated trading system will begin working for you.

# Problem Overview

## Trending Capitalizations in the market

The total market capitalization is currently split between Bitcoin and Altcoins with majority market shares generally fluctuating between the two. With over 1,300+ currencies and 7,000+ markets, it's no surprise that the 125+ cryptocurrency exchanges have exceptional daily volume. Although the exchanges have varying merits, they typically have only manual trading tools, so anyone looking to truly capitalise on the markets needs to be chained to their computers 24hr a day, 7 days a week – as cryptocurrencies trade day and night.

If you looked at the top cryptocurrency exchanges at the time of writing this paper, the combined 24hr trading volume as displayed and calculated on [www.coinmarketcap.com](http://www.coinmarketcap.com) was in excess of \$63 billion USD.

Some of the top cryptocurrency exchanges have reported to be growing by 1,000 to 3,000 new customers on a daily basis. Other platforms require users to be fully knowledgeable on crypto trading and the developments occurring within the projects to ensure maximum profits. These trading platforms usually facilitate what is known as pump and dumps, without any in depth trading knowledge or direct communication options, investors to these groups /communities can quickly find themselves alienated and trapped in a scam coin suffering a market dump by the team, new customers don't understand the risk involved and proves to be financially draining and only profitable for the early birds.

You need to understand the complexities of trading, as well as rapidly growing cryptocurrency market. To be successful with trading, you need to be constantly monitoring your trades and know what you are analyzing. To utilise other platforms - you need programming skills which add additional complexity and yet another barrier to entry. With new currencies being created every day, there is much to learn for all traders. To find this information, lots of research is required, which also consumes valuable time.

Dank Signals solves this problem by breaking down a full analysis on each discovery so the consumer requires little prior knowledge of trading practices or trend analysis. Users simply need to fund their accounts with dank tokens to begin receiving their automated rewards after selecting the coins they wish to trade. Users will also be provided an option to submit a trading trends that they have discovered for review. We provide direct consulting access with expert trade analysts which gives the user the option to directly connect with experts to verify an analysis they have discovered on their own, or any questions they have, while ensuring they are learning along the way. Consult-trading allows users to view a full explanation of trades being executed ranging from developmental updates - to how we actually analyzed the full market trend.

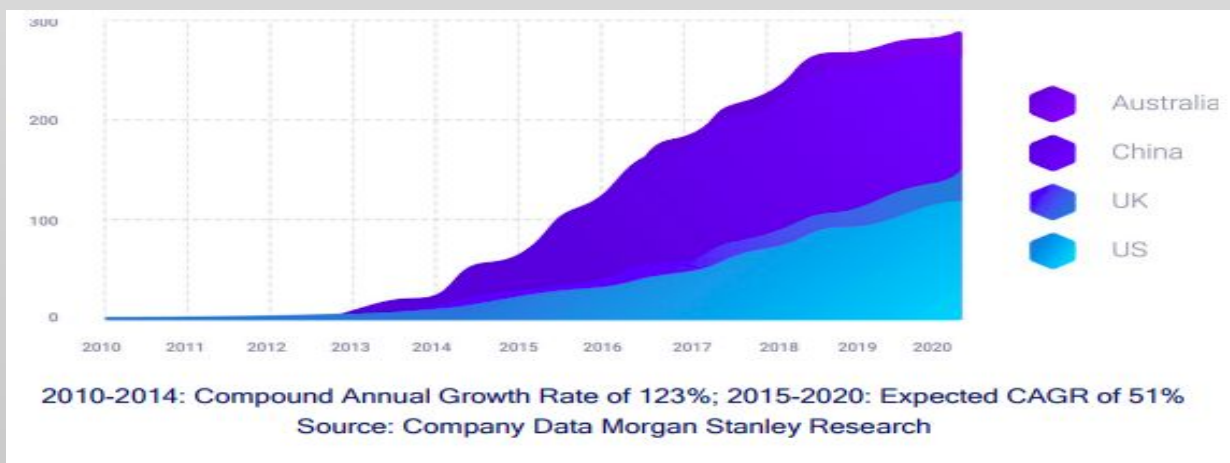

# P2P Investment Marketplaces

Investment Marketplaces are online platforms which enable user with information towards investing. Unlike banks, Investment marketplaces find ways to generate money aside from directly providing profits to investors. As such, they do not bear any risk to their balance sheets. They generate revenue in alternative methods.

Peer-to-Peer Investing is the practice of matching small investors and opportunists through online platforms. Investors are often able to gain access to earnings quickly, and typically at higher and faster rates than those offered by traditional means, making it an attractive alternative to mainstream investments. These investments are often comprised of many different investors, ranging from individual verified traders to institutional traders. Individual and professional investors benefit by being able to contribute funds and receive an alternative return worth a potential greater value which they can choose to sell or trade or other investments.

P2P investing has experienced rapid growth as borrowers seek better alternatives to banks. The global investing marketplace market is projected to reach \$290bn. by 2020, with an expected compound annual growth rate of 51% from 2014-2020.

Dank Signals social network will provide options for users to obtain valid and critical information within the space to further ensure safer investing is occurring. Our platform will provide detailed analysis on upcoming companies for users to review and judge for their own investing decisions. All advice is taken at the users own risk and no responsibility is beared to Dank Signals Traders Knowledge Hub.

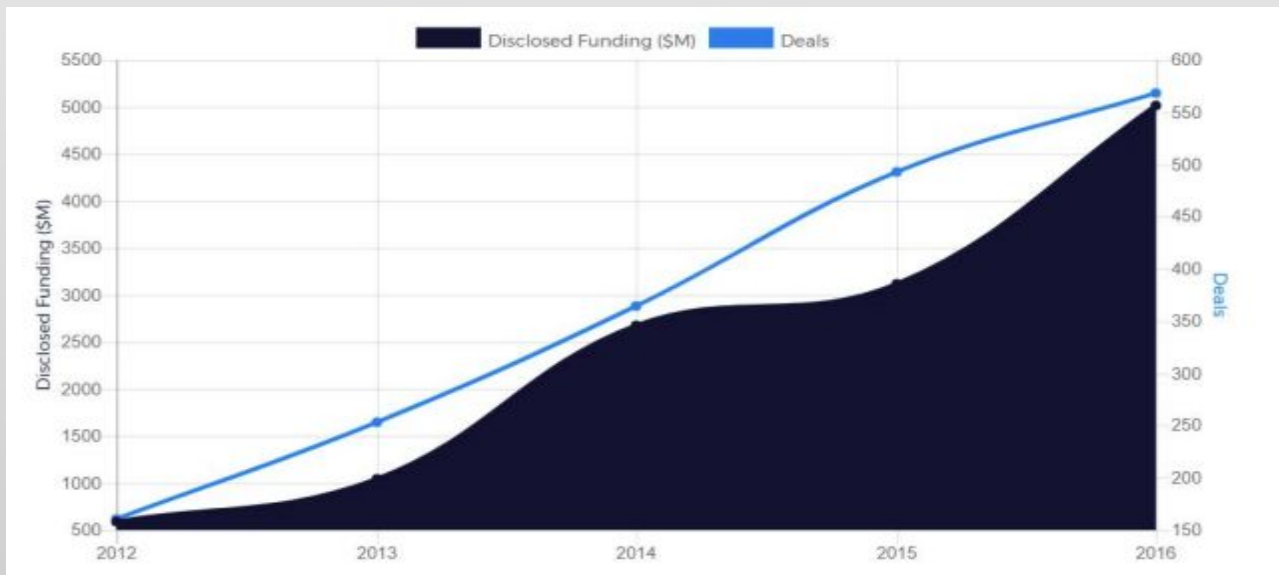

# Artificial Intelligence

Artificial intelligence is designed as software that recreates and replicates the activity of the human brain and how it processes and understands information. These AI models are particularly useful for predicting future events when trained on historical data.

The use of these technologies has greatly improved data science and data analyses which has recently become increasingly effective for certain tasks when compared to traditional algorithms based on hard coded rules and pure statistical analysis. Artificial intelligence as an evolving field, and represents the largest opportunity for staying ahead in any market where competition makes innovation necessary.

Artificial Intelligence has been around for many years, and investments in Artificial Intelligence-based startups is not a new thing. Since 2012, the number of deals and dollars contributed to Artificial Intelligence startups has been on the rise, and 2016 was a record year for startups globally. The chart below displays the increasing funding rounds of AI startups over the last 5 years

Artificial intelligence has been used for over 18 years in traditional financial market trading, to generate additional returns for many hedge funds and banks. This trend is expected to continue. For investment and trading decisions, financial services have recently been adopting AI tools. Capable of processing and comprehending data faster than any human, the potential for both high-frequency trading and longer-term predictions based on intelligent intuitions leads to substantially greater captured profits.

Our intelligent trading bots will be available for leasing prior to the token sale launch and fully capable of self-programming and reprogramming to match changes in the market, adjusting indicator weights, and continuous optimization as an agent motivated solely on maximizing the traders hourly return rate.

## What is Dank Signals?

Dank Signals is an user-friendly learning, investing, trading and growth experience platform. Utilizing Dank Signals removes the probability of human error, excludes emotional decisions caused by in-experience and importantly saves you from having to memorise complex trading strategies & learning/testing new abilities at the same time on a live-market. What's more, experienced or successful traders can make additional revenue in the form of DANK tokens by leasing common trade analysis explanations/lessons to other customers through the Dank Signal operations

This allows complete beginners to learn with confidence and ease by leasing these strategy lessons from the Dank Signal operations. Everything in the Signal operations has live metrics to show how the strategies have been performed, and ratings showing which strategies are the most popular. Inside the Dank Signals ecosystem, community members will be able to share cryptocurrency information, insight and views, ask questions and learn from fellow traders in our built in social trading network. Users will also be able to like and rate content.

## What's different about Dank Signals?

- Social trading network allows users to learn from, discuss and connect with other traders.
- Trading lessons with detailed explanations of what is actually occurring during trades and what to look for on your own.
- Direct consulting access with Expert trade analysts 24/7 ,365 days a year
- Pool crypto-investing - we are creating an option to invest your funds into pools with other investors to join upcoming ICO and secure applicable bonuses.
- Simulated settings allow you to test your strategies over a live market trend in real time without using real currency, this allows user to gain confidence within the markets.
- Option to purchase & utilize artificial intelligence trading bots directly with personal bittrex account via API that are quick and easy to set up with your own trading requirements or choose from a preselection of settings.
- Easy to set up with no programming skills required. Prior trading knowledge is not required.
- Users can choose from over 30 available trade indicators to help maximise their trading growth.
- Add over 25 safety configurations to test your strategy while limiting or prevent any losses
- Choose between different trading modes (invest, live-market, practice)
- Set parameters for gains in BTC markets, ETH markets, or USDT markets.
- Automatic Configuration - Allow the algorithm to decide what is the best method to utilize
- Lightweight decentralized application DAPP - secure, fast and accessible on the go for all customers

## How do you access Dank Signals?

### **Domain -**

You can access Dank Signals directly through our domain. We've created a fast and simple sign-up process. Because Dank Signals never holds any actual fiat currency, we don't need to perform any lengthy identification checks, so customers can be up and running in a matter of minutes, funding their accounts with any cryptocurrency they hold that is available for funding.

Simply create your account, then follow the simple step-by-step instructions to fund your Dank Signals account with ETH. Convert your loaded ETH into Dank Tokens (DANK) on our live exchange market, or load tokens previously bought from a P2P exchange to gain full access to our exclusive Dank Signals ecosystem after the token sale.

### **DAPP -**

You can access Dank Signals directly through our Decentralized Application (DAPP) once we have launched into the public. Users will be able to view token balances - quickly send or receive DANK tokens between dapp wallets with zero transaction costs. Users will gain direct on the go access to the entire social network

With on the go direct consulting and support access 24/7, public community group chat and daily top coin picks - you can be sure your in the dankest place at any time.

**The Dank Signals ecosystem has its own form of reward/engagement tokens called Dank Signals Tokens (DANK). Every purchase, lease, engagement, membership, exchange, reward or fee made on the social network will require the use of DANK Tokens, rather than fiat or alternative cryptocurrencies.**

## How do you use Dank Signals ?

Once you've funded your Dank Signals account with ETH or Dank Signals Tokens, it will convert those funds to DANK tokens so you can begin utilizing the key functions. You will need to fund your account first, then you will gain access to our exclusive eco-system - which hosts access to our member-only direct trade consulting, you can review investing options, study coin analysis on the market, or set-up smart-trading which utilizing artificial intelligence bots to run automated trades on pre-selected coins and more. Simply proceed to the User Dashboard and choose from the wide range available options & strategies or have a run at creating your own custom operation that others can learn from - for more experienced traders only.

Using our smart-trading options, you can run trial-tests to see how the bot strategy you submitted would have performed over live-markets in TESTNET function. When you're ready, you can set your trading parameters and let the bot do the rest, or choose from the fully automated functions and allow the Dank Signals algorithm to work its magic. You'll be able to watch the bot buying and selling in real-time. The outcome of the trade will automatically sync with your account and also show in your Dank trading activity in real-time, rewarding you with DANK Tokens as profits are obtained, which can be later converted to ETH/BTC elsewhere, and utilized within the ecosystem.

## Explanation of new token release

- ❖ Receive new tokens for unlocking participation achievements on the social network.
- ❖ Honestly report bugs and receive new tokens.
- ❖ Verify your trading profile and receive new tokens.
- ❖ Purchase any media opportunity and receive new tokens to complete the engagement
- ❖ Donate directly to the company and receive new tokens at market price.
- ❖ Have a function implementation proposal accepted by community voting and receive new tokens as a reward.
- ❖ Earn new tokens for creating content for infrastructure developments within Signal operations.
- ❖ Refer your friends - they will receive new tokens upon verified account sign-up.

## The development framework and language

For the first time in history, an immutable, decentralized ledger exists on a global scale, eliminating the need for middlemen, complex auditing systems, and long settlement times. Open (permissionless) protocols mean settlements no longer depend on connecting fragmented legacy systems. Additionally, because the ledger is append-only (existing records are immutable), it provides a high degree of accountability, with blockchain timestamping built-in. The most commonly used methods for ensuring consensus on a blockchain are Proof of Work and Proof of Stake. They ensure truthful consensus by making the costs of manipulating the network greater than the profit to be made from such deceitful transactions.

Dank Signals is backed by the latest Ethereum Blockchain Technology that executes functions via smart-contract calling. Without the need for human interference or execution, you can assure all transactions within the ecosystem will be precisely executed by artificial intelligence with guaranteed results.

# Dank Signals Monetization Model

- Access trading bot
- Lease/purchase strategies
- Lease/purchase educational courses
- Refer friends and receive tokens
- Media opportunities
- Community voting

## **Bot leasing and utilisation**

Within the Dank Ecosystem, users will be able to directly lease our AI automated trading bot. Users will purchase the bot using DANK tokens. User can utilise for periods of time and connect it to their exchange accounts via API configurations to profit from automatic order execution.

OUR BOTS DO NOT STORE API'S AND ONLY TRADE ON ONE COIN, THE COIN YOU SELECT FOR  
MAXIMUM SECURITY.

This works by simultaneously buying and selling a coin/token to ensure profit from the price differences within an allocated time frame. Information is withdrawn from our expert trade analysts as well as submitted community data for algorithm configuration for executions.

This investment option allows you directly and individually trade using our Artificial Intelligence Trading bots on a public market. Simply purchase a leasing option within our Bot Operations to gain access, connect your account and configure your trade settings. Users will have the option to choose from a wide range of trading parameters and utilise many available trade tools. You can select from BTC, ETH, or USDT markets on any coin available on the chosen exchange. Once set up, our artificial intelligence trading bots will go to work on the coins utilising the settings you select, generating profits directly into your exchange account. Since the bot utilises API configurations only, it doesn't provide any ability to withdrawal from your account This can only be done manually by the user within their exchange account for maximum protection.

Our trading bots also do not store your API keys for extreme protection of your account. You will need to submit your API key each time you utilise our trading bots.

## **ICO INFO**

The Dank Signals Social Network will highlight and publicize upcoming blockchain developments for community exposure. These companies will be thoroughly vetting before being shared. Our platform will present all relevant information which users should be educated prior to considering a token purchase should the project offer such sales. You will find a detailed description, all verified social channels of the company, their website, token sale dates, team member profiles, and more.

## **Lease your trade strategies**

Users have the option to sell or lease trade strategies and lessons to other users to help them gain expertise. Approximately 30% of the transaction fee is automatically paid to Dank Signals for managing the exchange of knowledge, the rest is paid to the customer who created the strategy in DANK tokens. The strategy is fully secured, this stops people attempting to copy the strategy for free or illegally distributing it outside of the ecosystem.

Example of a leasing transaction within the DANK Signal operations - Scenario A - user decides to make the strategy available to lease in DANK Signal operations for a fee of 50 DANK tokens . The purchasing user would fund their account properly to acquire the amount of DANK tokens to pay the leasing fee. In this example the leasing fee is decided at 50 DANK tokens.

Dank Signals commissions 30% of the sale therefore  $50 \times 0.30 = 15$  Dank. Dank Signals would automatically receive 15 Dank Signals tokens as commission for hosting the data sharing, while the submitting user would receive the remaining 35 Dank Signals Tokens. The same strategy can be leased to multiple learning-users at one time for stacked/accumulated DANK token earnings. For example, three leases on the same operation would result in 105 Dank Signals Tokens being awarded to the Leaser, with 45 DANK tokens being commissioned to Dank Signals.

Users are immediately able to purchase Dank Signals Tokens directly on our platform to purchase new educational courses.

## **Referrals - general public**

Customer may receive a reward or benefit, such as extra tokens, by spreading the word about us. Please refer to bounty program.

## **ICO Airdrop -**

From time to time the company will offer a free token airdrop to reward the community for engaging in operations. When these airdrops are offered, you can spread the good word about the Dank Signals Platform on social media & blog forms and we will give you 200 DANK tokens immediately once the platform is launched. You will be able to immediately utilize these tokens within the ecosystem

## **Invite a friend incentive -**

We will offer incentives to customers for inviting their friends to use Dank Signals. For every new friend that joins the Dank Investment tiers, both parties will receive 150 free referral tokens to use within the Dank Signals ecosystem or they can sell/convert these tokens if they choose to do so. Subject to individual manual account validation of referrals.

## **Bonuses within ecosystem for investment tier participants only.**

### **Consulting Access**

Token Holders will be eligible to receive direct one-on-one 24/7 trade consulting, as well as users wishing to subscribe to our consulting group, paying for membership with Dank Signals Tokens. Our highly educated and experienced team of market analysts will directly assist you with anything related to crypto markets. Whether you need help setting up, understanding a market analysis or wish to learn how to execute with precision on your own, our expert analysts and support will be there to help you grow in the most efficient and effective ways.

### **Trade executions/technical analysis**

Members will gain access to a wide range of a full technical analysis performed on an open market by our team. Participants will have the full transparency to see exactly what we execute on for capitalization with full details of the analysis and how we came to our decisions.

This will help users grow their portfolios on their own time, individually at their own pace while ensuring they truly understand what is going on and are provided with an outlet to practice and learn prior to making any decisions. Users will also be able to share their own technical analysis within the ecosystem with the potential to have effective analysis algorithms inputted directly into our bot strategies for the public to benefit from utilisation.

### **Practice strategies on testnet over live market trends.**

Do you have a trade strategy that you feel is perfect but you are nervous to test it over the live market using real currency? Dank Signals will provide users with options to utilise the trading bot, and trade strategies that they have studied or created on a testnet market, feeding real chart data & statistics to provide accurate results for the configurations they have designed. By utilising this feature, traders will be able to gain confidence and expertise within market analyses to execute with precision without putting risk of their valuable possessions/investments of cryptocurrency.

## Token Specifications

### Erc-20 token

New tokens created as new participants contribute funds into Dank Signals ecosystem, providing tokens as representation of donations for utilizing within the platform

### ***Distribution - initial supply 1,000,000,000 DANK***

100,000,000 DANK - 10% 100,000 ALPHA bot function testers (1000 tokens each)

200,000,000 DANK - 20% Pre Sale

500,000,000 DANK - 50 % ICO

50,000,000 DANK - 5% Bounties, Airdrop & Referrals

30,000,000 DANK - 3% Infrastructure & Expansions

20,000,000 DANK - 2% Marketing Expansion Project

100,000,000 DANK - 10% Team Fund - Locked for 1.5 years

**Max Capped Supply** - 25,000,000,000 DANK (25 Bil)

## The ICO

The DANK token ICO will be held in six rounds. Starting on May 11th, each round will last for 7 days - or until all tokens in that round have sold - whichever comes first. At that time. the next round will begin at the start of the following week. Round 1 will begin the private sale at 1 DANK = 0.01USD, rising the token price to 0.03 USD for the opening of round two - the pre sale, then increasing by 0.01 USD per round moving forward to the public, until the entire ICO has completed. The private sale will only be available for minimum contributions of \$1000.00 USD (min 100,000 DANK), Each user will be limited to a maximum contribution of \$50,000 USD per round to allow everyone a fair chance at contributing.

**Private Sale - Round ONE: 200,000,000 DANK tokens priced @ 0.01USD. ending once sold.**

**-14 day break-**

**Pre Sale - Round TWO: 100,000,000 DANK tokens priced @ 0.03 USD - begins 14 days after private sale ending.**

**Round THREE: 100,000,000 DANK tokens priced @ 0.04 USD - begins 7 days after last round start date.**

**Round FOUR: 100,000,000 DANK tokens priced @ 0.05 USD - begins 7 days after last round start date.**

**Round FIVE: 100,000,000 DANK tokens priced @ 0.06 USD - begins 7 days after last round start date.**

**Round SIX: 100,000,000 DANK tokens priced @ 0.07 USD - begins 7 days after last round start date.**

### **Presale Bonuses**

The DANK private sale is open to everyone for contributions above \$1000.00 USD and will offer the following bonuses for minimum contributions.

10% token bonus = \$5,000.00+ contributions

20% token bonus = \$10,000+ contributions.

40% token bonus = \$25,000+ contributions.

The ICO will proceed with no added bonuses and will accept Bitcoin, Ethereum Classic, Digibyte, Litecoin, & Ethereum as contribution payment methods.
